

		ITER, SIKSHA ‘O’ ANUSANDHAN (Deemed to be University)		Assignment																									
Branch		ALL		Programme																									
Course Name		Supply Chain Management Strategy		Semester																									
Course Code		OPL4004		Academic Year																									
				B. Tech.																									
				8 th																									
				2025-26																									
Assignment: 2			Topic: Operations management, Sourcing																										
Learning Level (LL)		L1: Remembering		L3: Applying																									
		L2: Understanding		L5: Evaluating																									
		L4: Analysing		L6: Creating																									
Q's		Questions		COs																									
				LL																									
1		“Service design involves physical, psychological, and sensory elements.” Analyse how these three elements interact to influence overall customer satisfaction.		CO3																									
				L3																									
2		Analyse the operations management (OM) decisions designed to create a transformation process in your university.		CO3																									
				L3																									
3		ABC Ltd., a small manufacturing unit, provides the following data for the year ended 31 st March 2025. Sales unit = 25,000; sales value = ₹4,00,000; fixed cost = ₹ 1,20,000; variable cost = ₹ 8 per unit. By using this information, (a) estimate the break-even point quantity, and (b) analyse the effect of the following cases on this estimated break-even quantity. (i) variable cost increases by 10%, keeping all other factors constant. (ii) selling price decreases by 10%, keeping all other factors constant. (iii) fixed cost increases by ₹ 30000, keeping all other factors constant.		CO3																									
				L4																									
4		Consider a small clinic where functional groupings are created, such as medicine, pharmacy, laboratory, and X-ray. The patients, the product in this case, move between departments based on their need. Do you think that process layout is the best facility layout in this case. Justify your answer.		CO3																									
				L3																									
5		Given the following manufacturing precedence relationships, compute the cycle time per day and the minimum number of workstations assuming eight working hours a day and 400 products need to be produced per day. <table><tr><td>TASK</td><td>DESCRIPTIOPN</td><td>TASK TIME (Seconds)</td><td>PRECEDING TASK</td></tr><tr><td>A</td><td>Punching</td><td>30</td><td></td></tr><tr><td>B</td><td>Bending</td><td>20</td><td>A</td></tr><tr><td>C</td><td>Combining</td><td>30</td><td>B</td></tr><tr><td>D</td><td>Painting</td><td>40</td><td>C</td></tr><tr><td>E</td><td>Polishiong</td><td>60</td><td>D</td></tr></table>		TASK	DESCRIPTIOPN	TASK TIME (Seconds)	PRECEDING TASK	A	Punching	30		B	Bending	20	A	C	Combining	30	B	D	Painting	40	C	E	Polishiong	60	D	CO3	
TASK	DESCRIPTIOPN	TASK TIME (Seconds)	PRECEDING TASK																										
A	Punching	30																											
B	Bending	20	A																										
C	Combining	30	B																										
D	Painting	40	C																										
E	Polishiong	60	D																										
				L3																									
6		A procurement manager has two suppliers before him to purchase a key component: (A) Supplier Q, a global supplier, with a purchase price of \$9,000 and transportation cost of \$1,500 (B) Supplier R, a local supplier, with a purchase price of \$10,200 and transportation cost of \$300		CO4																									
				L4																									

	The procurement manager sought your expert advice. Analyse the case and suggest your advice to the procurement manager.		
7	A mid-sized manufacturing company has traditionally sourced its raw materials from international suppliers due to lower costs. However, recent disruptions in global supply chains and growing community pressure have encouraged the firm to consider shifting to local suppliers. Analyse the risks and benefits of continuing with global sourcing versus transitioning to local sourcing and the factors the company should consider before making a final decision?	CO4	L3
8	While Apple Inc. designs its products like the iPhone in-house, it outsources much of its manufacturing to companies in China and India. Analyse the risks and benefits associated with this outsourcing decision taken by Apple Inc.	CO4	L3
9	“The purchasing strategy should support the business strategy of the firm to meet the firm’s long-term requirements”. Analyse this statement with an example of your choice.	CO4	L3
10	Hermit’s have a restaurant with an annual cost of goods sold of \$520000. Calculate the average inventory assuming 52 weeks per year and weeks of supply equal to 5.	CO4	L3

Note:

1. Assignment-II carries a weightage of 6 marks.
2. The course outcomes 3 and 4 were covered.

Course Outcomes	CO3	Students will be able to analyse the process of integration, operations management, and marketing interfaces required to design efficient and responsive supply chain systems.
	CO4	Students will be able to analyse sourcing and logistics decisions through selection of supplier, transporter, warehousing, and distribution, using cost, service, and risk considerations.

NB:

1. Date of Assignment-II given – 29.04.2026
2. Date of submission of Assignment-II - on or before 06.05.2026
3. Faculty members have to collect the assignments from the students attending the physical classes in hard copy and from the students attending online classes through google form.
